It offers scientific and professional entry-level competency along with advanced theoretical and practical knowledge in the specialized fields. Students do their masters in the particular subject that they have studied during their graduation course.

This degree course gives a solid foundation for those who want to pursue higher studies and enroll in Programmes like M. Phil. or Ph.D. It is a way by which to acquire jobs in areas like Food and beverages Industry, Medical Organizations, Utility, and Energy Research and Health Organizations.
Students who wish to pursue higher studies can opt for courses like M. Phil. Chemistry or Ph.D. in Applied Chemistry.

MAJOR SUBJECTS

- Inorganic Chains
- Rings, and Clusters, Stereochemistry
- Reaction Mechanism,
- Group theory and Quantum Chemistry,
- Analytical Chemistry, etc

JOB OPPORTUNITIES

PRIVATE SECTOR

- Content Developer
- Assistant Professors
- Online Tutor
- Solid State Chemistry Expert
- Research Officer (Chemistry/ Biochemistry)
- Application Specialist – Analytical Chemistry

- TN Fireman service
- Indian Army

B.Sc. Mathematics

SCOPE / OBJECTIVE

B.Sc. Mathematics is an undergraduate degree in the domain of Mathematical studies. The course aims at providing knowledge about disciplines of Mathematics such as Calculus, Differentiation, Integration, Linear programming, etc.

The best opportunity immediately after this course is to pursue higher studies like MCA, M.Sc IT, Actuarial Sciences, MBA or M.Sc in Mathematics.

The world is your oyster afterwards, with a plethora of opportunities in research, academia, and technical institutes. Career opportunities include jobs at financial companies, software developers, marketers and bankers; everyone wants a good mathematician. In applied mathematics, you'll have to creatively solve problems in business and social domains. Data analytics, a field which is the talk of town, often needs people who are good with numbers and understand data. With excellent mathematical abilities, you might just be picked up by political or military intelligence bodies to work as a cryptanalyst who deciphers encrypted messages.

After completing BSc Mathematics, students have various options they can take up and have a promising career ahead as the scope is bright. You can either build your way up in India or manage to land a dream job abroad as well.

MAJOR SUBJECTS

- Integral Calculus and Trigonometry
- Differential Equations
- Abstract Algebra
- Numerical Analysis
- Differential Geometry
- Vector Analysis

JOB OPPORTUNITIES

PRIVATE SECTOR

- Aerospace companies
- Market research firms
- Pharmaceutical companies
- Research and Development Firms
- Engineering Firms
- Economic Research Firms
- Social Research Institutes
- Manufacturing Firms

- All the BANK exams

M.Sc. Mathematics

SCOPE / OBJECTIVE

M.Sc. Mathematics is a two-year Postgraduate Programme which is being divided into four semesters. In this degree, candidates get a deeper knowledge of advanced Mathematics through a vast preference of subjects such as geometry, calculus, algebra, number theory, dynamical systems, differential equations, etc.

A Post-graduate in Mathematics has a deep knowledge of pure and applied Mathematics subjects. Students can develop problem-solving and reasoning skills over time so these things help in considerably improve the chances of being hired in the research field.

Students can get a chance in the financial sector and the government sector. They will be the best for the work profile of analytic science consultant, actuarial analyst, database manager, external auditor, data analyst, customer coordinator, credit analyst, and quantitative risk analyst. Students can choose the teaching field and become a professor in government and private colleges. Secondary school teacher, technical subject matter experts, academic coordinator, middle school teachers, and science teachers are also earning good amount after their post-graduate degree.

After completing a Post-graduate degree in Mathematics, students can opt for higher studies. They can go in the research field and pursue M. Phil. or Ph.D. in mathematics.

MAJOR SUBJECTS

- Advanced Abstract Algebra
- Advanced Differential Equations
- Linear Algebra
- Differential Geometry and Tensors
- Hydrodynamics

B.Sc. Physics

SCOPE / OBJECTIVE

The aim of the course is to educate students in all the basic fields of Physics including, electromagnetic, optics, mechanics and electronics.

B.Sc Physics paves a strong ground for students for further studies in Physics concentrated courses. It also trains graduates to get entry-level jobs in the private or government sector.

Candidates who study B.Sc Physics degree also gain expertise in lab work through practical sessions and training Programmes which help them excel at the workplace.

Students who are creative and have an interest in Physics and relevant subjects can pursue B.Sc Physics course. It is a good option for those who wish to study, explore and experiment in fields related to Physics. They can implement their imagination in understanding the scientific phenomena and discover methodologies for the benefit of mankind
After completion of B.Sc Physics course candidates can go for higher education or they can get a job in a relevant field.

MAJOR SUBJECTS

- Semiconductors
- Wave and Optics
- Statistical Physics
- Nuclear Physics
- Electromagnetic Theory
- Electricity Magnetism

JOB OPPORTUNITIES

PRIVATE SECTOR

- Lab Supervisor
- Researcher
- Consulting Physicist
- Research Associate
- Senior Physicist
- Technician
- Teacher(School)
- Scientist
- Assistant Scientist

M.Sc. Physics

SCOPE / OBJECTIVE

M.Sc. Physics or Master of Science in Physics is a two-year-long Post-graduate level course. A Postgraduate degree in Physics involves in-depth study of matter, the motion of matter through space and time, and its related concepts like force and energy. Broadly speaking, it is a general study of nature for understanding the behavior of the universe.

The course gives students a scope for developing their problem solving, mathematical, communication skills and critical thinking, which further broadens into interpreting scientific data that is a blessing to scientific researchers.

This course is for those who want to discover and design via analytical thinking and have an interest in searching for various sustainable materials. It is a good option for those who want to be at the edge of high-end technology and want to pursue it nationally internationally. Ideal candidates for this course would be those who have superb numerical skills along with clarity of thought processes to write scientific reports.

MAJOR SUBJECTS

- Mathematical Methods
- Classical Mechanics
- Quantum Mechanics
- Solid State Physics
- Atomic Spectroscopy
- Nuclear Physics
- Statistical Mechanics
- Astrophysics
