## Marketing advantages:

low Market costs, hand on experience regarding customer, Market handling, Improving customer services etc.

## Exploitation of competitive advantages:

enjoys competitive advantage through trademarks, brand name, and technology etc.

## Political factors:

### Avoidance of trade barriers:

companies establish production facilities in foreign market to avoid trade barriers like high export tariffs, quotas etc.

### Economic development Incentives:

Government at different levels like - local, state and national levels offer Incentive.

b)

## World Trade And protectionism

### Meaning of protectionism:

Protectionism is the practice of following protectionist trade policies. A protectionist trade policy allows the government of a country to promote domestic producers, and thereby boost the domestic production of goods and services by imposing tariffs or otherwise limiting foreign goods and services in the marketplace.

### Types of protectionism

#### Tariffs:

- \* The taxes or duties imposed on imports are known as tariffs.
- \* Tariffs increase the price of imported goods in the domestic market, which consequently, reduces demand for them.

Disadvantages of protectionism:

Limited choices for consumers:

consumers have access to fewer goods in the market as a result of limitations on foreign goods.

Increase in prices (due to lack of competition):

consumers will need to pay more without seeing any significant improvement in the product.

Economic isolation:

It often leads to political and cultural isolation, which, in turn leads to even more economic isolation.

18)

a)

## Non - Tariff Barriers

### 1. Licenses:

License is granted by the government and allows the Importing of certain goods to the country.

### 2. Voluntary Export Restraints (VER):

These types of barriers are created by the exporting country rather than the Importing one.

These restraints are usually levied on the request of the Importing company.

### 3. Quotas:

Under this system, a country may fix in advance, the limit of Import quantity of commodity that would be permitted for Import from various countries during a given period.

## OUTCOMES:

The outcomes of the remedial class report provide valuable insights into the progress and development of students who have received additional support and instruction. This comprehensive analysis highlights the effectiveness of the remedial program in improving academic performance and helping students overcome challenging subjects.

The report not only showcases the academic growth of the students but also identifies areas for further improvement and tailoring instruction to meet individual learning needs. By examining the results and feedback presented in the report, educators and policymakers can make informed decisions to enhance the quality of remedial education and support student success.

## OUTCOMES:

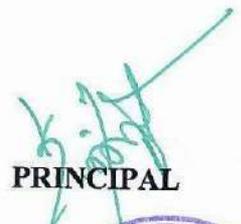

The outcomes of the remedial class report provide valuable insights into the progress and development of students who have received additional support and instruction. This comprehensive analysis highlights the effectiveness of the remedial program in improving academic performance and helping students overcome challenging subjects.

The report not only showcases the academic growth of the students but also identifies areas for further improvement and tailoring instruction to meet individual learning needs. By examining the results and feedback presented in the report, educators and policymakers can make informed decisions to enhance the quality of remedial education and support student success.

## OUTCOMES:

The outcomes of the remedial class report provide valuable insights into the progress and development of students who have received additional support and instruction. This comprehensive analysis highlights the effectiveness of the remedial program in improving academic performance and helping students overcome challenging subjects.

The report not only showcases the academic growth of the students but also identifies areas for further improvement and tailoring instruction to meet individual learning needs. By examining the results and feedback presented in the report, educators and policymakers can make informed decisions to enhance the quality of remedial education and support student success.

## SHAKESPEARE

### SAMPLE QUESTIONS (III YEARS)

#### ANSWER THE FOLLOWING QUESTIONS:

1. Discuss the role of fools in Shakespeare's Play.
2. Write a note on Shakespeare's Theatre.
3. Give an interpretation on *Sonnet 15*.
4. Trace the motif of the disguise throughout the play *The Taming of the Shrew*.
5. Elaborate the role of temptation in *Julius Caesar*.
6. Justify the title *The Tempest*.
7. Summarize the role of Ariel and Caliban.

# Shakespeare

1. Discuss the role of fools in Shakespeare's Plays.

\* Introduction:

The word fool is derived from the Latin follis which means a pair of bellows or a wind bag. So fools and clowns look and act silly. Fools wear the motley dress.

Origin of Shakespeare's fools:-

Some say that Shakespeare's fool is derived from Erasmus. Others feel that he is descendant of Devil or vice or Morality plays. To some, the fool is the medieval minstrel or jocular. Some feel that Elizabethan fool is modeled on the jester of the Courts of nobles.

Function of the fools.

The fools make the audience laugh with their wit and humour. In the intervals of action they keep the dialogue going on.

They are shrewd judges and licensed critics of men and matters. They expose the follies without fear.

## 2. Bring out the Conditions of Elizabethan Theatre:

### Introduction:-

Prior to the Elizabethan age, there were only strolling theatrical companies which carried their simple and crude stage from place to place. When Shakespeare arrived in London in about 1585 the Elizabethan stage was in the state of evolution.

### Play houses:-

When Shakespeare reached London there were three kinds of theatres. They were, Public theatres, Private theatres and the Halls of Royal Palaces and the Inns Court.

The Swan Theatre and Newington Butts were the three public theatres to which was added Rose two years later. In 1599 the Swan Theatre in which Shakespeare himself had a share was constructed.

The Public play houses were in the suburbs. They accommodated 3000 spectators at a time.

Private Play houses :-

The Private Play houses were smaller, rectangular completely roofed indoor theatres found within the city of London.

Plays were performed during the night by candle lights. The Private Play houses were exclusively used by boys companies and later on by King's men.

The Stage :-

The Elizabethan stage had four main parts namely (a) the front stage, a bare rectangular platform without a curtain in the front the back stage the part behind the pillars serving as a room in a tower or an office an inner stage with curtains which served many purposes an upper stage just above the inner stage which was used as the balcony.

The Elizabethan theatres had no drop curtains, so a scene began when the actors entered and closed when they left.

4. Write about the role of temptation in Julius Caesar.

Introduction:

Cassius is a strong republican. He believes that Caesar is against republic. He is an enemy of Caesar's growing popularity and power. He fears that if Caesar becomes the king, he will become a dictator.

He feels that Brutus has the ability to complete any action with more worthy of it. Therefore he tempts Brutus to head the conspiracy.

Deciding the greatness of Caesar:

Cassius first tempts Brutus by belittling Caesar. He tells Brutus that though Caesar is the greatest and powerful in Rome, people do not admire him. He has many weaknesses. He cites two incidents to prove his argument.

At once Cassius rescued. Got severe fever. In his illness, he shook without stamina and his lips and eyes become pale. Like a sick girl, he cried and asked for water.

## Caesar's Over Confidence:

Cassius tries to induce in Brutus that Caesar is arrogant and treats the public with no sympathy. He tries to win the entire race and want to be the coveted position by himself.

But Cassius finds that belittling Caesar does not make any expected result in Brutus. So in his unflinching attitude and high spirit he decides to flatter Brutus.

## Cassius' Flatter on Brutus:

Cassius flatters Brutus that he is a man of unspiced virtues. But Brutus fails to realize his nobility and importance as a Great Roman.

Then Cassius says that he does not want Caesar's name to be sounded more than Brutus name. Though Caesar is powerful, Brutus is lovable to all Romans. Thus the flattery of Cassius moves Brutus to think over his position in Rome.

Alonso and Ferdinand are at Prayers Antonio and Sebastian visit Alonso to bid the final farewell. If everyone loses hope and gets ready to face the fate.

Conclusion :-

The opening scene is very short but important for the subsequent scene. This scene is full of chaos and catharsis. The effect of the play is given by its title.

# 1. Elizabethan Theatre.

## Introduction:

When Shakespeare arrived in London in about 1585, the Elizabethan stage was in the state of evolution.

## Play houses:

When Shakespeare reached London there were three kinds of theatres. They were public theatres, private theatres and the Halls of Royal palaces and the inner court, to which was added Rose two years later. In 1599 the Swan theatre in which Shakespeare himself had a share was constructed.

## Public play houses:

Public play houses like the Swan or the Swan were large round outdoor theatres. Only the balconies and the stage were covered and usually the plays were performed in the afternoons. 3000 spectators at a time. The uppermost gallery was covered with a thatched roof.

The poem refers to marriage but to the marriage of minds rather than the actual ceremony. The poem describes love for a young man and this love would not be sanctioned in Shakespeare's time by an actual marriage service.

### Conclusion:

The poem refers to ideal love which does not fade and lasts until the end, which also reminds the reader of the wedding vow in sickness and in health. It is little surprise that this sonnet remains a steadfast favorite in wedding ceremonies today.

## OUTCOMES

- **Improved Academic Performance:**  
To improve the specific learning gaps and help students catch up with their peers and perform better in regular classes and standardized tests.
- **Enhanced Understanding and Mastery of Concepts:**  
It provide students with the time and resources to fully understand and master challenging concepts and the ability to apply knowledge in different contexts.
- **Increased Student Engagement:**  
Targeted learning through remedial classes can increase student engagement. When students see progress and understand the material better, they are more likely to participate actively in class and show interest in learning.
- **Development of Learning Strategies:** Remedial classes often teach students effective learning strategies such as note-taking, time management, and problem-solving skills. These strategies are valuable not only for overcoming current challenges but also for future academic pursuits.
- **Social and Emotional Growth:**  
Beyond academics, remedial classes can contribute to students' social and emotional growth. The supportive environment of these classes helps students build resilience, develop positive relationships with peers and teachers, and improve their self-confidence.

#### AIM

Remedial education refers to specialized educational programs designed to meet the needs of students who struggle to meet academic standards in different subjects. This can be due to gaps in their learning or because the standard educational framework does not suit them.

#### OBJECTIVES

Offering remedial education, teachers can lay the foundation for students' lifelong learning, helping them develop positive attitudes and values and prepare them for future studies and careers. These are the objectives of remedial teaching strategies. Let us now understand what are the strategies of remedial teaching.

PG DEPARTMENT OF CHEMISTRY

ACADEMIC YEAR: 2024-2025

LEARNERS – REMEDIAL SLOW CLASSES REPORT

## AIM:

The aim of the remedial class report is to present a detailed evaluation of students' academic performance, focusing on their strengths, weaknesses, and overall progress.

It helps in identifying specific learning gaps and areas where students require additional support or reinforcement. By analyzing performance trends and individual challenges, the report provides valuable insights to educators for developing targeted teaching strategies.

The ultimate goal is to enhance student understanding, boost confidence, and improve academic outcomes. This report also serves as a communication tool between teachers, students, and parents to ensure collaborative efforts in the learning process.

### LEARNERS – REMEDIAL SLOW CLASSES REPORT

#### REPORT FOR REMEDIAL CLASSES

Remedial classes were conducted to the following students. The classes were conducted by the Subject in charges from 2.00 pm to 3.00 pm.

In order to identify the following students who are slow learners through University semester examination results. The following students are very slow understanding for the all subjects. We gave question bank for revision through remedial classes for students.

These students are lacking the understanding capacity of subjects. They are mostly not asking doubts. Faculty members gave a recommendation for reference books to refer his subjects. Students are interested in the laboratory classes and theory classes.

- Additional teaching hours and study time to the students which help them to score marks in their papers.
- Group activities like peer learning, group discussion were conducted to boost interactive learning and confidence among them.
- They were provided with study guides for tests so that slow learners know what information they need to concentrate on.
- By asking question to the students, Personal attention and monitoring helps them to understand subject by this remedial classes.
- With peer learning we help them to complete their assignments and improve in test.

### OUTCOMES:

The outcomes of the remedial class report provide valuable insights into the progress and development of students who have received additional support and instruction. This comprehensive analysis highlights the effectiveness of the remedial program in improving academic performance and helping students overcome challenging subjects.

The report not only showcases the academic growth of the students but also identifies areas for further improvement and tailoring instruction to meet individual learning needs. By examining the results and feedback presented in the report, educators and policymakers can make informed decisions to enhance the quality of remedial education and support student success.

## UNIT TEST - I

6) Solution of gases in Liquids: -

\* Solubility of gases in liquid depends on pressure, temperature, nature of gas, nature of liquid and other soluble component present in the solution.

Henry's Law: -

\* Mass of a gas dissolved in volume liquid at constant temperature are directly proportional to the pressure of the gas present in equilibrium with the liquid.

 $W \propto P$       $W \Rightarrow$  Mass of gas

$$W = KP$$

Where  $K$  is the constant

We know that

$$W = KP$$

$$K = W/P \rightarrow \textcircled{1}$$

\* The free energy change of mixing  $\Delta G_{mix}$  is given by

$\Delta G_{mix}$  = Free energy solution - sum of free energies of pure A and B.

$$= G - (n_A \overset{\circ}{G}_A + n_B \overset{\circ}{G}_B) \rightarrow (2)$$

$\overset{\circ}{G}_A, \overset{\circ}{G}_B$  are free energy (mole) of pure A and B respectively.

Substituting (1) in (2)  $\Rightarrow$

$$\Delta G_{mix} = (n_A \bar{G}_A + n_B \bar{G}_B) - (n_A \overset{\circ}{G}_A + n_B \overset{\circ}{G}_B) \rightarrow (3)$$

We know that chemical potential ( $\mu$ )  
 $\mu = \overset{\circ}{\mu} + RT \ln a$

Since identically with partial molar free energy  $\bar{G}$ .

$$\bar{G}_A = \overset{\circ}{G}_A + RT \ln a_A \text{ for } A$$

$$\bar{G}_B = \overset{\circ}{G}_B + RT \ln a_B \text{ for } B$$

$$\bar{G}_A = \overset{\circ}{G}_A + RT \ln a_A \rightarrow (4)$$

$$\bar{G}_B = \overset{\circ}{G}_B + RT \ln a_B \rightarrow (5)$$

Substituting eqn (4) & (5) in (3)  $\Rightarrow$

$$\Delta G_{mix} = n_A (G_A + RT \ln a_A - G_A^\circ) + n_B (G_B + RT \ln a_B - G_B^\circ)$$

$$\Delta G_{mix} = n_A RT \ln a_A + n_B RT \ln a_B \rightarrow (6)$$

For Ideal solution.

$$a_A = x_A \quad \text{and} \quad a_B = x_B$$

$x_A, x_B$  Mole fraction of A and B respectively.

$$\Delta G_{mix} = n_A RT \ln x_A + n_B RT \ln x_B \rightarrow (7)$$

$$\Delta G_{mix} = n_A RT \ln x_A + n_B RT \ln x_B + n_C RT \ln x_C \dots$$

$$\Delta G_{mix} = RT \sum n_i \ln x_i$$

Volume change of mixing ( $\Delta V_{mix}$ ) for an Ideal solution.

We know that

$$\left( \frac{\partial(\Delta G)}{\partial P} \right)_T = \Delta V \rightarrow (8)$$

For Free energy of mixing we apply the above equation

$$\left( \frac{\partial(\Delta G_{mix})}{\partial P} \right)_T = \Delta V_{mix}$$

$$\Delta G_{mix} = n_A (G_A + RT \ln a_A - G_A^\circ) + n_B (G_B + RT \ln a_B - G_B^\circ)$$

$$\Delta G_{mix} = n_A RT \ln a_A + n_B RT \ln a_B \rightarrow (6)$$

For Ideal solution.

$$a_A = x_A \quad \text{and} \quad a_B = x_B$$

$x_A, x_B$  Mole fraction of A and B respectively.

$$\Delta G_{mix} = n_A RT \ln x_A + n_B RT \ln x_B \rightarrow (7)$$

$$\Delta G_{mix} = n_A RT \ln x_A + n_B RT \ln x_B + n_C RT \ln x_C \dots$$

$$\Delta G_{mix} = RT \sum n_i \ln x_i$$

Volume change of mixing ( $\Delta V_{mix}$ ) for an Ideal solution.

We know that

$$\left( \frac{\partial(\Delta G)}{\partial P} \right)_T = \Delta V \rightarrow (8)$$

For Free energy of mixing we apply the above equation

$$\left( \frac{\partial(\Delta G_{mix})}{\partial P} \right)_T = \Delta V_{mix}$$

1)

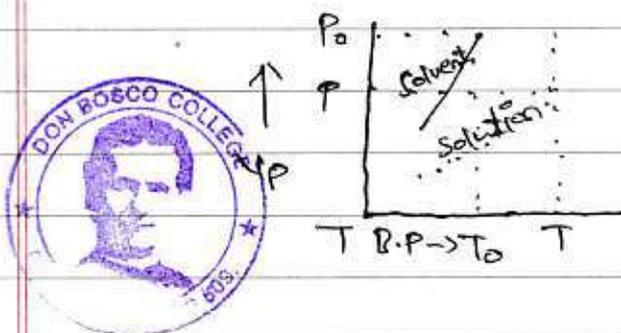

Thermodynamic elevation of boiling point

The boiling point of a liquid is the temperature at which its vapour pressure becomes equal to pressure over it which is normally one atmosphere.

The vapour pressure of a solvent is lowered when a non-volatile solvent is dissolved in it.

Thus the vapour pressure of the solvent is higher than that needed to vapour pressure of a solvent to one is less than that needed to raise the vapour solution to one atmosphere. In other words the boiling point solvent (T) is higher than that of the solvent. We say that non-volatile solute has elevated the B.P of the solvent. The difference between T and  $T_0$  ( $T - T_0$ ) is called the elevation of boiling point i.e.)

$$T_0 = \Delta T_b$$

1) The elevation in B.P of a solution is non electrolyte is proportional to its molality (m)

$$\Delta T_b \propto m$$

6)

Nernst distribution law

"A solid or liquid distributes itself between two immiscible solvents in such a way that the ratio of its concentration in the two solvents is constant. The ratio of the concentration in the two solvents is called Co-efficient (or) distribution Co-efficient."

Limitations:

- This law holds good only when
- 1) The temperature is constant
  - 2) The substance dissolves in both the solvents without association (or) dissociation
  - 3) The concentration of the solute is low
  - 4) No chemical reaction takes place between the solute and either of the solvents.

## 7) Degree of association:-

Many organic solutes undergo association in non-aqueous solution. Due to association two or more molecules of the solute form a bigger molecule.

So the number of effective molecules or particles in the solution decreases. Thus the measured osmotic pressure, the elevation of boiling point or the depression in freezing point is less than the calculated values.

Solute	Solvent	Observed molecular weight	Calculated molecular weight
Acetic acid	Benzene	118	90
Benzoic acid	Benzene	242	122

## Degree of Dissociation

Many inorganic acids, bases, salts undergoes dissociation in aqueous solution. Due to dissociation the molecules break down into positively and negatively charged ions.

So number of effective particles in solution increases

Thus the measured colligative properties are more than the calculated values. The molecular weights of solutes in such cases will be less than the molecular weight

Solute	Solvent	Observed molecular weight	Calculated molecular weight
KCl	Water	38.75	74.5
$\text{Na}_2\text{SO}_4$	Water	49.84	142

## AIM:

The Advanced Learner report aims to provide detailed insights into the progress and development of learners, offering valuable information that can be used to enhance their educational experience and tailor teaching practices to suit individual needs.

## OBJECTIVES:

The objectives of this advanced learner are:

- ❖ To provide a comprehensive overview and analysis of the student's progress and proficiency levels, highlighting areas of strength and areas for improvement.
- ❖ This report aims to track the student's learning outcomes and performance, serving as a valuable tool for educators and parents to understand the individual's academic development and personalize their learning journey accordingly.
- ❖ It also plays a crucial role in facilitating effective communication between teachers, students, and other stakeholders involved in the educational process, ultimately contributing to the enhancement of the overall learning experience.

### ADVANCED LEARNERS – REPORT

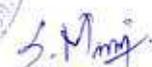

#### REPORT FOR ADVANCED LEARNERS' CLASSES

Advanced Learner Classes were organized for students who performed well in their academics, with the aim of further enhancing their knowledge and skills. These sessions were held every day from **2:00 p.m. to 3:00 p.m.** by the respective subject in-charges. **Question banks** were given to the learners for effective revision, and they were encouraged to ask doubts freely, which created an interactive and engaging atmosphere.

Faculty members also recommended **reference books** to help students explore topics beyond the regular syllabus. Students participated actively in both **theory and laboratory sessions**, showing great enthusiasm for learning.

Additional activities such as **group discussions, seminars, assignments, and cycle tests** were conducted to strengthen understanding and instill confidence. These classes not only improved academic performance but also motivated students, enhanced their communication skills, and prepared them to perform better in examinations.

12. Define the term phase, component & degree of freedom:-

Phase:

Phase is defined as homogenous physically distinct and mechanically separable parts of heterogenous system.

Ex: Salt solution (or) Sugar solution  $P=1$

Component:

The minimum number of atoms or molecules in terms of which composition and energy phase can be expressed.

EX: (1) Ice  $\leftrightarrow$  water  $\leftrightarrow$  water vapor  $C=1$

Degree of freedom:

The minimum number of variables such as pressure, temperature, composition etc, which must be arbitrarily fixed in order to define the system completely

Examples:

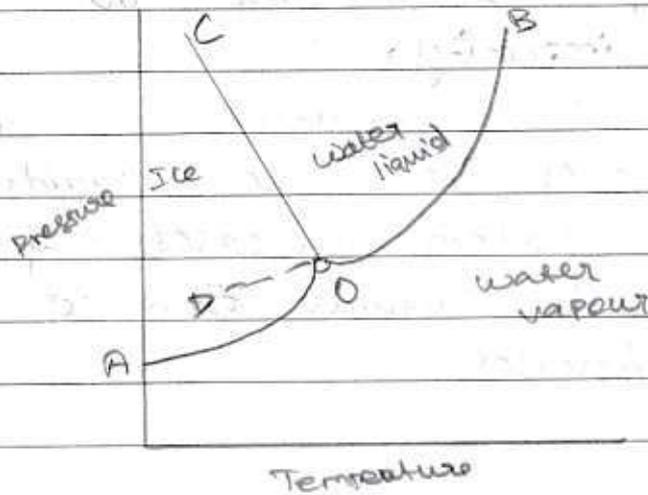

Let us consider a system of 1 mole of an ideal gas. We know that  $PV=RT$ . If any two of these variables such as  $P$ ,  $V$  &  $T$  is known, the third variable can be easily determined. Hence the degree of freedom is 2.

part - c

15 (a) Phase diagram of water system:

water system:-

The areas:

These are three AOC, OOB, and AOB and create in the diagram. In each area only one phase is present.

$$\text{Hence } F = 1 - 1 + 2 = 2$$

Thus it is necessary to specify 2 degree of freedom such as temperature and pressure.

The lines:

AO is the sublimation curve of water. Along this curve ice and liquid water and water vapor are in equilibrium.

OC is the fusion curve of ice. Along this curve ice and liquid water are in equilibrium. This curve shows the effect melting point of ice

$$F = 1 - 2 + 2$$

$$F = 1$$

Triple point: 0

At this point ice, liquid water and water vapour are in equilibrium. So this is called triple point then

$$F = 1 - 3 + 2$$

$$F = 0$$

Meta stable equilibrium

curve OD represents the meta stable equilibrium. when water is cooled water and its stability is less if a bit of ice is added then the water is immediately the whole mass become solid such equilibrium is called meta stable equilibrium.

Application of clapeyron equation:

The slope of fusion curve is negative. The molar volume of ice is greater than the molar volume liquid water so  $\Delta V$  of water is negative

$$\frac{\Delta P}{\Delta T} = \frac{\Delta S}{\Delta V}$$

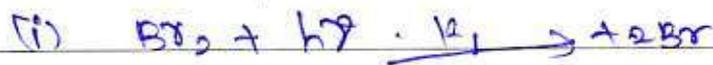

$\Delta S$  is always positive. The slope the curve  $\frac{\Delta P}{\Delta T}$  with depend upon the value of  $\Delta V$  only and it is negative in the case of water.

17-(a)

Kinetics of hydrogen-bromine reactions:-

The photo chemical reaction of molten  $H_2$  and  $Br_2$  vapour in visible light is chain reaction and it proceeds with measurable speed at 433-491  $\mu$ . The primary process is the dissociation of molecule into atoms.

The secondary reactions are

The reaction is highly endothermic and takes place slowly.

$$\frac{d[Br]}{dt} = k_1 I_{abs} \rightarrow (1)$$

The rate of formation of HBr

$$\frac{d[HBr]}{dt} = k_2 [Br][H_2] + k_3 [H][Br_2] + k_4 [H][HBr] \rightarrow (2)$$

Applying steady state principle to  $[H]$

Rate formation of intermediate =

\* rate of its disappearance

$$k_2 [H_2][Br] = k_3 [H][Br_2] + k_4 [H][HBr] \rightarrow (3)$$

- Group activities like peer learning, group discussion were conducted to boost interactive learning and confidence among them.
- They were provided with study guides for tests so that slow learners know what information they need to concentrate on.
- By asking question to the students, Personal attention and monitoring helps them to understand subject by this remedial classes.
- With peer learning we help them to complete their assignments and improve in test.

## OUTCOMES:

The outcomes of the remedial class report provide valuable insights into the progress and development of students who have received additional support and instruction. This comprehensive analysis highlights the effectiveness of the remedial program in improving academic performance and helping students overcome challenging subjects.

The report not only showcases the academic growth of the students but also identifies areas for further improvement and tailoring instruction to meet individual learning needs. By examining the results and feedback presented in the report, educators and policymakers can make informed decisions to enhance the quality of remedial education and support student success.

## 1. Ligands :-

\* The molecules (or) ions which coordinate bonds with the metal atom (or) metal ion. The contribution of lone pairs of electrons are called ligands.

\* This ligands (or) coordinating groups in a complex compound act as Lewis bases. ~~Classification of ligands~~

### Classification of ligands :-

\* Ligand contains one (or) more than one donor atoms for coordination with the central ion.

### monodentate (or) unidentate ligands :-

\* Ligands which donate only one pair of electron to attach the central metal ion are also known as monodentate (or) unidentate ligands.

Ex:  $\text{NH}_3$ ,  $\text{H}_2\text{O}$ ,  $\text{Cl}^-$ ,  $\text{Br}^-$ ,  $\text{CN}^-$ ,  $\text{OH}^-$ ,  $\text{NO}_2^-$ ,  $\text{CO}$  etc ...

### Bidentate ligands :

\* Ligands which have two donor atoms have the tendency to attach the central metal ion are also known as bidentate ligands.

## AIM:

The aim of the Advance learner report is to provide detailed insights into the progress and development of learners, offering valuable information that can be used to enhance their educational experience and tailor teaching practices to suit individual needs.

## OBJECTIVES:

The objectives of this advance learner are:

- ❖ To provide a comprehensive overview and analysis of the student's progress and proficiency levels, highlighting areas of strength and areas for improvement.
- ❖ This report aims to track the student's learning outcomes and performance, serving as a valuable tool for educators and parents to understand the individual's academic development and personalize their learning journey accordingly.
- ❖ It also plays a crucial role in facilitating effective communication between teachers, students, and other stakeholders involved in the educational process, ultimately contributing to the enhancement of the overall learning experience.

### ADVANCED LEARNERS – REPORT

#### REPORT FOR ADVANCED LEARNERS' CLASSES

Advanced learner classes were conducted for the students who were better in their academic performances. Every day the classes were conducted from 2.00 pm to 3.00 pm by the respective subject in charges. Question banks were provided for revision to the advanced learners so that they can study more.

The students were encouraged to ask doubts. Faculty members gave recommendations regarding reference books for their respective subjects. Students took part actively with enthusiasm in the laboratory classes as well as in theory classes.

Additional teaching hours and Group activities like advanced learning, group discussion, seminar, assignments and cycle test were conducted to learn more and instill confidence in them to perform better in the examinations.

Inorganic Chemistry

i) Werner Theory :-

In 1893 Alfred Werner proposed the theory of co-ordination compounds and their structure to explain in this theory.

The theory emphasizes the number and nature of groups to form a central metal ion.

Postulates of this theory :-

The co-ordination compounds exhibit two types. These are

i) Primary Valency.

ii) Secondary Valency.

The primary valencies are ionizable and non-directional.

Then secondary valencies are non-ionizable but directional.

5 marks :-

1) ligands :-

The molecules (or) ions which to form a co-ordination with metal atom (or) metal ions on central metal ions, its to contribute a lone pair of electrons is called ligands.

classification of ligands :-

The ligands to donate one (or) more donor atoms to attached central metal ions.

There are three types.

i) monodentate ligands :-

The monodentate ligands donate a only one donor atoms to form a co-ordination bond with central metal ions.

That is called monodentate ligands

Example  $\rightarrow$   $\text{Cl}^-$ ,  $\text{Br}^-$ ,  $\text{CN}^-$ ,  $\text{NH}_3$

Factors affecting stability of ligands:-

The ligands to form a stable complex than ordinary ligands.

This is called on chelating ligands

The ligands are do not form a ring structure with 5 membered ring structure.

Then another way it was formed stable complex on 6 membered ring structure

Ligands to form a stable complex in small group with large (or) complex.

1 mark:

1)	b)	H <sub>2</sub> O
2)	b)	36
3)	b)	ring
4)	a)	Potassium hexa cyano ferrate (II)
5)	c)	36

## DEPARTMENT OF PHYSICS

ACADEMIC YEAR 2024-2025

### REPORT ON REMEDIAL CLASSES

#### Aim

- ❖ To help students who have fallen behind to catch up with their peers and meet academic expectations.
- ❖ To bridge learning gaps and address specific difficulties in core subjects like reading, writing, and math.
- ❖ To improve overall academic performance and confidence.

#### Objectives

- **Individualized Instruction:** Assess individual strengths and weaknesses to provide tailored support and re-teach concepts that were not learned effectively.
- **Skill Enhancement:** Strengthen fundamental skills in specific subjects and develop a deeper understanding of the material.
- **Positive Reinforcement:** Provide encouragement and foster a positive attitude toward learning to combat learning attrition and build motivation.
- **Supportive Environment:** Create a supportive environment where students can learn without the pressure of a large group, which helps them overcome learning difficulties and behavioral issues.
- **Reintegration:** Equip students with the skills and confidence needed to eventually reintegrate into mainstream classes.

## REPORT ON REMEDIAL CLASSES

Remedial classes were conducted the Subject In charges at 2.00 pm to 3.15 pm. We have given additional teaching hours and study time to the students which help them to score marks in major and Allied papers. Concentrated all the arrear students and executed properly according to subject wise. The Students those who have arrears they are all having old question papers of their arrears. It went on well and we hope all the arrear students those attended the remedial class will get pass on university exams.

**Outcome:**

- ❖ The learning outcomes of remedial classes include improved academic performance, a stronger grasp of foundational skills, and enhanced confidence.
- ❖ They work to bridge learning gaps by identifying specific student struggles and providing targeted support.
- ❖ Ultimately helping students catch up with their peers and become more independent learners

## DEPARTMENT OF PHYSICS

### REPORT ON ADVANCE LEARNER'S

#### Report:

Advanced learners are students who show exceptional abilities in understanding concepts, applying knowledge, and thinking critically. They often grasp lessons faster than their peers and need additional challenges to stay motivated. Schools and teachers must recognize their potential and provide suitable learning experiences that help them excel academically and personally.

#### Characteristics of Advanced Learners:

Advanced learners typically demonstrate:

- Strong curiosity and a desire to explore new ideas.
- Quick understanding of complex concepts.
- Independence in learning and problem-solving.
- Creativity and innovative thinking.
- High motivation and strong communication skills.

These learners thrive when given opportunities to extend their learning beyond the standard curriculum.

### Teaching Approaches for Advanced Learners:

Teachers can use various methods to meet the needs of advanced learners, such as:

- **Differentiated Instruction:** Adapting lessons to match students' readiness levels, interests, and learning styles.
- **Project-Based Learning:** Encouraging independent research and creative projects that promote deep understanding.
- **Inquiry-Based Learning:** Allowing students to ask questions and find solutions through exploration and experimentation.
- **Mentorship Programs:** Pairing students with mentors or experts in a specific field for advanced guidance.

### Role of Technology and Enrichment Activities:

Technology offers advanced learners access to online resources, educational apps, and virtual learning environments that extend learning opportunities. Enrichment activities like science fairs, debates, reading clubs, and innovation challenges help students develop critical and creative thinking skills while boosting confidence.

### REPORT ON SLOW LEARNER'S

#### Aim:

To identify the learning difficulties of the student and implement strategies to improve academic performance, self-confidence, and overall classroom participation.

#### Objectives:

1. To observe and assess the areas where the student faces learning challenges.
2. To analyze the causes of slow learning (such as attention, comprehension, or motivation issues).
3. To provide remedial measures and teaching strategies suitable for the student's learning pace.
4. To track the progress and improvement of the student over a period of time.

1. Remedial Class
2. Prepare different learning exercises to help our students get a hang of the topics that are hard for them to comprehend.
3. Peer Mentors.
4. Appreciate the achievements of your students, even if they are small. It motivates them to perform better and improve their performance.
5. Make Use of Active Learning.

#### Activities for Slow Learners:

1. Conduct group activities to boost interactive learning and confidence among them.
2. Organize games related to their learning topic in order to instill curiosity towards it.
3. Come up with oral activities where students are encouraged to express their ideas.
4. Rectify their mistakes and guide them properly to formulate their ideas into words.
5. Curate exercises and homework with lower difficulty levels and gradually increase the difficulty level for the students to get acquainted with the topics at a slower pace.

#### Observation / Findings

- The student often takes longer to understand new concepts.
- Has difficulty in concentrating during lessons.
- Shows low confidence in class participation.
- Performs below average in written assessments.
- Responds better in one-to-one or small group activities.

## DEPARTMENT OF B.A JMC (DPM)

ACADEMIC YEAR: 2024-2025

### LEARNERS – REMEDIAL SLOW CLASSES REPORT

#### AIM:

The aim of the remedial class report is to present a detailed evaluation of students' academic performance, focusing on their strengths, weaknesses, and overall progress.

It helps in identifying specific learning gaps and areas where students require additional support or reinforcement. By analyzing performance trends and individual challenges, the report provides valuable insights to educators for developing targeted teaching strategies.

The ultimate goal is to enhance student understanding, boost confidence, and improve academic outcomes. This report also serves as a communication tool between teachers, students, and parents to ensure collaborative efforts in the learning process.

#### OBJECTIVES:

The objective of this report is to identify and understand the challenges faced by slow learners in college and to develop effective strategies to support their academic growth. It aims to assess their learning difficulties, study habits, and motivational levels while evaluating existing support systems within the institution. The report seeks to recommend remedial measures such as personalized learning plans, mentoring, counseling, and skill enhancement programs. Ultimately, the goal is to promote inclusive education by ensuring that slow learners receive equal opportunities to succeed, improve academic performance, and enhance their confidence and overall educational experience.

## PG DEPARTMENT OF SOCIAL WORK

### - II - MSW

#### ADVANCED LEARNER LIST (2024 – 2026)

Students are given additional questions from each unit. They are asked to write home test for the entire subject regularly and get signature from the particular staffs. Weekly once they are asked to stay back in college after the college hours for meeting their subject staff for clarifying their doubts. They had given critical analysis – based seminar topics and they are asked to share with their peers so both are benefited.
