WORLD POPULATION DAY

OBJECTIVE:

- To empower the youth and to educate them about various aspects of sexuality so that they can delay marriage until the time where they can handle their own responsibilities.
- To make the youth understand about the ways to prevent unwanted pregnancy by using safe birth control methods.
- To eliminate certain gender stereotypes and ideas that exists in the society.
- To explain them about illnesses during pregnancy and certain health danger and effects of early childbirth.
- To spread awareness about sexually transmitted diseases and their prevention.
- To bring certain laws to protect the right of a girl child.
- To ensure that both boys and girls get equal access to education.
- To ensure access of proper reproductive health care services to couples everywhere

INTRODUCTION:

World population day is an annual event, observed on 11th July every year, which seeks to raise awareness of global population issues. The event was established by the governing council of the United Nation Development Program in 1989. It was inspired by the public on July 11, 1987. The approximate date on which the world's population day aims to increase people's awareness on various population issues such as the importance of family planning, gender equality, poverty, and maternal health and woman rights. The day was suggested by Dr KC Zachariah in which population reaches five billion when he worked as demographer at world's bank. There is a general awareness in the global population that only at the increment of whole billions of people, the world population increases annually by 100 million approximately in every 4 months.

ACTIVITIES:

- ✓ Identity the factors that lead to an increase in population growth,
- ✓ Research two countries with regard to their population trends
- ✓ Create a chart for comparison between the two countries
- ✓ It is not minor health issues but also the root cause leading to poverty, gender inequality, violence, illiteracy and requiring joint efforts from the whole community to address.

LEARNING:

World population day is the celebration of awareness, one which tries to get people to know and learn about population issues. Issues include rights, rights to health, the baby's health, gender equality, child marriage, use of contraceptive, sex education, knowledge about sexually transmitted disease etc...

CONCLUSION:

The primary aim is to take initiative in increasing awareness about reproductive health problem among the people. This is due to the fact that a large number of pregnant women succumb to poor reproductive health. Research shows that 800 women die every day due to the process of birthing a baby. Therefore, the primary aim and importance of this day is to get more and more people to know how to boost their reproductive health, pay attention on the importance of family planning.
